

Financial Reporting and Preparation Can Be Easy

DrillPoint Reports allows you to access your financial data within Microsoft® Excel® and create presentation-quality financial statements for delivery to your board and external advisors with any number of pre-formatted financial statement templates.

In addition, DrillPoint Reports allows you to manipulate your data, add formulas, graphs and other more advanced Excel features to maximize the value of the information you're presenting to others.

SSA Drillpoint Source of Funding custom financial report illustrates a number of DrillPoint formatting features including the ability to add borders, graphics and other personal touches to customize your statements for your audience.

You have the ability to generate and customize the reports that you need and then disseminate them to your management team, board of directors or other external parties for review. You can also create the reports so that running them is a breeze, with the ability to open the template and run the formatted version of your financial reports with refreshed data from Abila MIP at any time.

- Integrate Microsoft Excel directly with Abila MIP Fund Accounting in real-time.
- Leverage Microsoft Excel functionality to manipulate your data, conduct what-if analysis and add formulas and graphs to your reports for better report presentation.
- Drill down directly from Microsoft Excel to specific transactions for more detailed information, saving you the extra step of having to go back to MIP for the same information.
- Create custom financial statements using pre-formatted templates that enable you to include borders, graphics, your organization's logo and other personal touches to distinguish your financials, making them easier to read and use.
- Create statistical or outcomes measurement reporting by using MIP user-defined fields in your reports.
- Group account segments into a linear style account report.
